

Sand Hill Elementary School Student Device Information

Due to current circumstances, Sand Hill Elementary has decided that all students should take their devices home daily. Here are some important reminders:

- Device should be **fully** charged each night.
- Device should be brought to school each day. The charger should stay at home.
- If your child forgets their device at home, we will not be able to provide a loaner.
- The protective cover on the device should never be removed.
- Students should not eat or drink around the device.
- If your child is experiencing technical difficulties with their device, you should submit an MLS support request. This can be found in your child's Clever account. It can also be found on the DD2 Technology webpage.

Our MLS team and/or Cantey Technology will contact the media center if a device exchange is needed. Please do not contact the school for assistance with technology, unless it is for a forgotten password or damaged device.

- If the device is damaged, please keep in mind that the district will cover the first incident. Anything after that, you would be charged based on the price list in the DD2 Student Device Handbook (QR code below). In addition, lost or damaged chargers will cost \$20.
- For your child's safety, the district has provided safeguards that will limit access to certain sites and will also monitor usage.
- If you withdraw your child from Sand Hill Elementary (even if you are staying within district), the device and charger must be returned immediately. If it is not returned within one week, the device will be reported to the police as stolen.
