The "Action" curriculum has been updated to reflect the State and environment as it is in 2020.

It still has the great SC facts with hands-on lessons and new e-Learning for K-12 students.

Each teacher attending will receive the "Action" notebook (which is correlated to the SC Science Standards) along with posters, DHEC grants information, environmental videos and door prizes made from recycled materials.

This is a link to our web page that will give you some more info
http://takeactionsc.org/

And visit our YouTube channel which has some e-Learning activities.
